Aromatherapy Trail

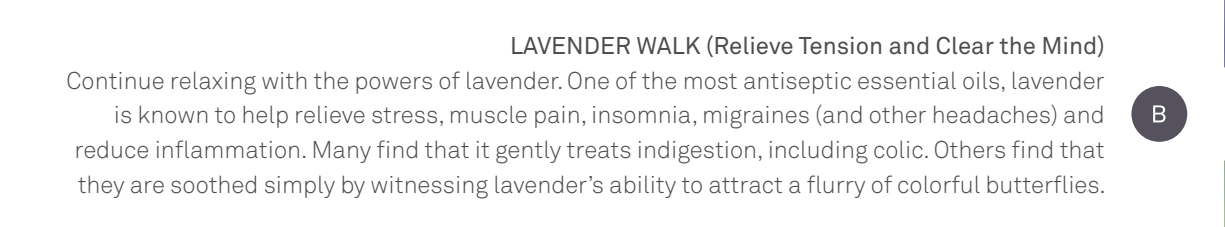

THE PATH TO HEALTH AND WELLNESS

Rejuvenate the mind. Invigorate the body. And awaken your senses during a peaceful walk or run through the Aromatherapy Trail. Discover carefully chosen plants whose restorative powers of aromatherapy can help heal the soul and body.

CHAMOMILE WALK (Anti-Stress and Anxiety)
Start your path with the powerful smell of chamomile, a simple, healthy and delicious way to relieve anxiety and tension. Chamomile's wonderful fragrance can help relieve stress and promote general relaxation. When it's made part of your daily routine, it helps deliver long-lasting benefits.

While passing by this section, don't miss a stop at our chlorophyll station to take advantage of its cleansing properties.

LAVENDER WALK (Relieve Tension and Clear the Mind)
Continue relaxing with the powers of lavender. One of the most antiseptic essential oils, lavender is known to help relieve stress, muscle pain, insomnia, migraines (and other headaches) and reduce inflammation. Many find that it gently treats indigestion, including colic. Others find that they are soothed simply by witnessing lavender's ability to attract a flurry of colorful butterflies.

MINT WALK (Energizing and Revitalizing)
Mint is far more than a refreshing flavor in a cup of tea, it's also a powerful antiseptic and stress reliever. It can be used as an astringent and an antiemetic, contains antibacterial and antimicrobial properties and as an antiviral, works wonders as a decongestant and expectorant. And of course, there is nothing quite like having fresh, minty breath.

EUCALYPTUS WALK (Pain Relief)
Used in a variety of over-the-counter medicines, eucalyptus possesses antibacterial, anti-inflammatory and analgesic properties. It acts not only as a powerful decongestant, but its germicidal and analgesic qualities also help soothe and heal wounds, bites and burns. Eucalyptus helps increases brain wave activity and counters physical and mental fatigue, which means walking along the trail can quite literally, be an eye opener.

For an extra boost of energy, pass by our Lemon & Green Tea Station.

GARDENIA WALK (Antidepressant)
For centuries, the heavenly fragrance of gardenias has been known to cleanse the foulest of moods. A detoxifying agent, gardenias also help relieve stress, anxiety and tension. The flower contains properties that allow its oil to be used in aromatherapy as an antibacterial, antidepressant, anti-inflammatory, and for correcting hormonal imbalances.

Remember to hydrate yourself with the finest coconut water, nature's most powerful drink.

The Lush Spa

Inspired by nature and balance, our indoor/outdoor Lush Spa is your private sanctuary of bliss and wellness. Enjoy a massage with the tranquil sounds of water and chirping birds all around you. Feel the warmth of rich wood decks and soft lounge areas bidding you to relax and unwind. Or discover the restorative essential oil treatments, aromas and beautiful vistas of the outdoors.

All depictions of matters of detail shown hereon, including, without limitation, items of finish, furniture and decoration, are conceptual only and are not necessarily included in the Unit. For a correct representation of the items included in the Unit, see the Purchase Agreement. Stated dimensions shown hereon are approximate and are measured to the exterior face of exterior walls and to the center line of demising walls. This method of measurement varies from, and is larger than, the dimensions that would be determined by using the description and definition of the "Unit" set forth in the Declaration (which generally only includes the interior airspace between the perimeter walls and excludes interior structural components). Note that measurements of rooms set forth on this floor plan are generally taken at the greatest points of each given room (as if the room were a perfect rectangle), without regard for any cutouts. Accordingly, the area of the actual room will typically be smaller than the product obtained by multiplying the stated length times width. All dimensions are approximate and may vary with actual construction.
